EDUCATION

B.Tech, Information Technology

ABES Engineering College (AKTU), Ghaziabad · CGPA 8.05/10 · 2023 – 2027

Class XII (PCM)

St. Joseph's Senior Secondary School, Puranpur · 81.4% · 2021

EXPERIENCE

LLM Post-Training Intern — Ethara AI

Apr 2026 – May 2026

- Evaluated LLM responses against **structured rubrics** for correctness, instruction following and response quality.
- Performed structured testing, benchmarking and feedback analysis to evaluate model responses and **identify performance gaps**.

PROJECTS

CarePulse — Multi-tenant hospital management system

Ongoing · Team of 2

Python · FastAPI · SQLAlchemy · PostgreSQL · React.js · TypeScript · Docker · GitHub Actions

- **Backend: 60 REST API operations** in Python / FastAPI across 16 feature modules, each built as router, service and repository layers with SQLAlchemy 2.0 and Alembic migrations.
- **Data & multi-tenancy: PostgreSQL row-level security** per tenant plus a role-permission matrix; clinical writes go to an **append-only ledger** (trigger-enforced) enabling “as-of” replay.
- **Concurrency & jobs:** Queue tokens stay unique under simultaneous sign-ups using a lock plus **bounded retry**; a background job is **safe to rerun** and to run on several workers via PostgreSQL advisory locks.
- **Correctness:** A Playwright test exposed commits running **after the response was sent** (stale reads); fixed so every 2xx means the write is committed, with a test checking every route.
- **Testing: 155 pytest tests** (25 unit, 86 integration on real PostgreSQL, 44 security) plus Hypothesis and Playwright; a latency test asserts **p95 search < 300 ms over 50,000 patients**.
- **Security:** JWT with refresh tokens, **argon2** password hashing, sign-in rate limiting with Retry-After, and an **audit trail of every patient-data read**.
- **CI/CD: GitHub Actions** starts a throwaway PostgreSQL per job and runs pytest, ruff, strict mypy, ESLint, dependency audits and Docker builds.

HireStream — Job portal for recruiters and candidates

Live

MongoDB · Express.js · React.js · Node.js

- **Backend & APIs:** Built **15+ REST endpoints** (Node.js, Express) for users, companies, jobs and applications, with **JWT auth middleware** guarding protected routes.
- **Data modeling:** Designed **MongoDB schemas** (Mongoose) for 4 collections linked by ObjectId references; used **nested population** to return applicants with profiles and applications with company details in one request.
- **Hiring workflow:** Duplicate-application checks, a **pending / accepted / rejected** status pipeline for recruiters, and case-insensitive **\$regex keyword search** over job titles and descriptions.
- **Security & uploads:** **JWT in httpOnly cookies**, bcrypt hashing and recruiter-only routes; photos, résumés and company logos uploaded via **Multer + Cloudinary**.

Live: <https://hire-stream-delta.vercel.app> · Repo: <https://github.com/Shoaib-Navi/HireStream>

TerraLoom — Property listing platform

MongoDB · Express.js · Node.js · EJS · Passport.js

- **Authorization:** Owner-only listing edits and author-only review deletion via Express middleware; **cascade-deletes reviews** with a Mongoose post-delete hook.
- **Auth & security:** Passport.js sessions **stored in MongoDB** (connect-mongo), **Joi** schema validation and **Helmet** CSP headers.
- **Maps & media:** **Mapbox** geocoding saved as **GeoJSON**; listing images uploaded to Cloudinary via Multer.

Repo: <https://github.com/Shoaib-Navi/TerraLoom>

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C++, SQL

Backend & APIs: FastAPI, Node.js, Express.js, SQLAlchemy, Pydantic, Alembic, REST APIs, JWT Auth, RBAC

Databases: PostgreSQL, MongoDB, Mongoose, Row-level security, Triggers

Frontend: React.js, Redux Toolkit, React Router, Tailwind CSS, TanStack Query

Testing & DevOps: pytest, Playwright, Vitest, Docker, GitHub Actions, Hypothesis, Docker Compose, Caddy

Tools: Git, GitHub, Postman, Vercel, Cloudinary, Mapbox

ACHIEVEMENTS

- **Winner** — Smart India Hackathon 2025 (internal round) — TrueGrad, an OCR-based academic certificate validator.
- **354 problems solved** — LeetCode: 169 Medium, 42 Hard; contest peak 1,709 (top 18%), up from 1,418 in Feb 2026.
- **McKinsey & Company Forward Program** — Structured problem solving and communication.
