

Mohd Shoaib

Software Engineer | Full-Stack (Python, FastAPI, Node.js, React, MongoDB) | LLM Applications
+91 99975 69431 | mohdshoaib97569@gmail.com | [linkedin.com/in/shoaib-navi](https://www.linkedin.com/in/shoaib-navi) | github.com/Shoaib-Navi

Education

ABES Engineering College (AKTU), Ghaziabad 2023 – 2027
Bachelor of Technology in Information Technology CGPA: 8.05/10
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems
St. Joseph's Senior Secondary School, Puranpur – *Class XII (PCM): 81.4%* 2021

Technical Skills

Languages: Python, JavaScript (ES6+), TypeScript, SQL, C++
Backend & APIs: FastAPI, Pydantic, SQLAlchemy, Alembic, Node.js, Express.js, REST APIs, JWT Auth, RBAC
Databases: MongoDB (Mongoose: Schema Design, Population, Hooks), PostgreSQL (Row-Level Security, Triggers)
Frontend: React.js, TanStack Query, Redux Toolkit, React Router, Tailwind CSS
AI / LLM: Gemini API, Prompt Engineering, Context Grounding, LLM Evaluation (Rubrics, RLHF/SFT)
Testing & DevOps: pytest, Hypothesis, Vitest, Playwright, GitHub Actions, Docker, Docker Compose, Caddy
Tools & Platforms: Git, GitHub, Postman, Vercel, Cloudinary, Mapbox

Experience

Ethara AI Apr 2026 – May 2026
LLM Post-Training Intern Focus: LLM Evaluation, Instruction Following, RLHF/SFT Data

- Evaluated **LLM responses** against structured **rubrics** for correctness, instruction following and response quality
- Wrote rating justifications and structured feedback used in **post-training (RLHF/SFT-style)** workflows
- Ran **structured tests** with targeted prompts and edge cases to surface **instruction-following failures**

Projects

CarePulse – Hospital Management System | Ongoing, team of 2 Aug 2026 – Present
Python, FastAPI, SQLAlchemy, PostgreSQL, React.js, TypeScript, Docker

- Product:** Outpatient system for Indian clinics covering registration, live queue, vitals, consultation, lab orders and results, prescriptions and pharmacy dispensing for **6 staff roles**
- Backend: 60 REST API operations** in **Python / FastAPI** across 16 feature modules, each built as router, service and repository layers with SQLAlchemy 2.0 and Alembic migrations
- Data & Multi-Tenancy:** **PostgreSQL row-level security** per tenant plus a role-permission matrix; clinical writes go to an **append-only ledger** (trigger-enforced) enabling “as-of” replay
- Security:** JWT with refresh tokens, **argon2** password hashing, sign-in rate limiting stored in PostgreSQL, and an **audit trail of every patient-data read**
- Quality & CI/CD:** **155 pytest tests** (incl. Hypothesis property tests), Vitest and **Playwright** end-to-end tests; **GitHub Actions** runs ruff, strict mypy, ESLint, dependency audits and Docker image builds

HireStream – AI-Powered Job Portal | [GitHub](#) | [Live](#) MongoDB, Express.js, React.js, Node.js, Gemini API

- Backend & APIs:** Built **15+ REST endpoints** (Node.js, Express) for users, companies, jobs and applications, with **JWT auth middleware** guarding protected routes
- Data Modeling:** Designed **MongoDB schemas** (Mongoose) for 4 collections linked by ObjectId references; used **nested population** to return applicants with profiles and applications with company details in one request
- Hiring Workflow:** Duplicate-application checks, a **pending / accepted / rejected** status pipeline for recruiters, and case-insensitive **\$regex keyword search** over job titles and descriptions
- Security & Uploads:** **JWT in httpOnly cookies**, bcrypt hashing and recruiter-only routes; photos, résumés and company logos uploaded via **Multer + Cloudinary**
- AI Assistant:** **Gemini API** chat grounded in the user’s profile and **20 latest job listings**; handles HTTP 429

TerraLoom – Property Listing Platform | [GitHub](#) MongoDB, Express.js, Node.js, EJS, Passport.js

- Authorization:** Owner-only listing edits and author-only review deletion via Express middleware; **cascade-deletes reviews** with a Mongoose post-delete hook
- Auth & Security:** Passport.js sessions **stored in MongoDB** (connect-mongo), **Joi** schema validation and **Helmet CSP** headers
- Maps & Media:** **Mapbox** geocoding saved as **GeoJSON**; listing images uploaded to Cloudinary via Multer

Achievements & Certifications

- LeetCode:** **354 problems** (169 Medium, 42 Hard); contest peak **1,709 (top 18%)**, up from 1,418 in Feb 2026
- Winner, Smart India Hackathon 2025 (Internal):** TrueGrad, an OCR-based academic certificate validator
- McKinsey & Company Forward Program:** Structured problem solving and communication ([certificate](#))
