EDUCATION

- ABES Engineering College, Ghaziabad
B.Tech – Information Technology | CGPA: **8.05** | 2023–2027
- St. Joseph's Senior Secondary School, Puranpur
Class XII – PCM | **81.4%** | 2021

TECHNICAL SKILLS

- **Languages:** C++, C, JavaScript, TypeScript, SQL, Python
- **Backend:** Node.js, Express.js, FastAPI, REST APIs, MongoDB, PostgreSQL
- **Frontend:** React.js, Next.js
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems
- **Tools:** Git, GitHub, Docker, Postman, Google Colab
- **Soft Skills:** Problem Solving, Teamwork, Communication

EXPERIENCE

Ethara.ai — LLM Post-Training Intern | April 2026 – May 2026

- Contributed to **LLM post-training and evaluation projects** focused on improving model performance, response quality, and instruction following.
- Performed **structured testing, benchmarking, and feedback analysis** to evaluate model responses and identify performance gaps.

PROJECTS

CarePulse — Multi-tenant Hospital Management System | FastAPI, PostgreSQL | Ongoing, solo project

- Clinic system covering outpatient visits, inpatient admissions and billing: **185 REST API operations across 36 feature modules** in Python / FastAPI with SQLAlchemy and Alembic.
- Isolated each clinic with **PostgreSQL row-level security** and a role-permission matrix; clinical writes go to an **append-only, trigger-enforced ledger**.
- Covered by **925 pytest tests** (unit, integration on real PostgreSQL, security), run with linting, type checks and Docker builds in **GitHub Actions**.

HireStream — Job Finding & Recruitment Portal | MERN

- Developed a full-stack recruitment platform enabling **recruiters to post jobs** and candidates to **search, apply, and track applications**.
- Built a modular backend with **RESTful APIs** for job management, applications, and user workflows.
- Implemented **keyword search** over job titles and descriptions, with **filters for location, role and salary**.
- Designed clean backend architecture with structured data handling for maintainable and scalable application development.

Terraloom — Property Listing Platform

- Developed a full-stack property listing platform enabling users to **list, search, and review properties**.
- Built dynamic property listings with **image uploads, location details, and pricing management**.
- Structured the app as **Express routes, controllers and Mongoose models (MVC)** with server-rendered EJS views.

ACHIEVEMENTS

- **LeetCode: 368 problems solved, peak contest rating 1,709**, demonstrating strong algorithmic problem-solving skills.
- **1st Position — SIH 2025 Internal Hackathon**, for developing an Authenticity Validator for Academia.
- **McKinsey & Company Forward Program — Certified**, with training in problem-solving, leadership, communication, and business fundamentals. [[link](#)]
